

**Moduline designer
Judy Peters:**

- Eight years experience designing kitchens for Moduline
- Travels regularly to the USA and Europe to keep up latest trends
- Multiple award winner
- HIA Kitchen Designer of the Year as well as Bathroom Designer of the Year for 2009

What Judy says about kitchens:

"Kitchens sell homes! Designing and installing the right kitchen takes an experienced designer backed up by a professional team. I am passionate about design and I love to see the transformation from a difficult space to a beautiful kitchen you want to use."

"Your kitchen should not only be practical and functional but also allow you to enjoy your experience cooking and be a place you are proud to share with friends and family. You should never underestimate the importance of colour, especially in a kitchen where it can set the mood. A kitchen should never be a dull place."

PROFESSIONAL SERVICE: Moduline kitchen designers Dan Shearman and Judy Cook

**Moduline designer
Daniel Shearman**

- Has lived in Townsville for 25 years
- specialises in managing your entire design project
- Qualified tradesman
- Nine years with Moduline
- Multiple award winner (HIA)
- Excellent product knowledge
- Innovative designer, creative in his use of space
- Will design to client's budget.

What Dan says about kitchens:

"The kitchen is the central part of the house, it is a meeting place so it has got to be functional, look good and suit the style of the house."

"It's all about the design – some people want a kitchen that is functional but they don't spend much time in it, while others want to be able to interact with others in the house or entertain while they are cooking or preparing food. "You don't have to have a big budget or a big room to have a great kitchen."

Get the designer look

WHEN you desperately need a kitchen renovation but don't know where to begin, chances are a kitchen designer could save the day.

While you might be tempted to weild the hammer yourself, take note – renovating a kitchen can be a daunting task. The secret is to enlist the services of professionals.

The trick is to look for a cabinet maker that employs professional kitchen designers. Their job is to guide you through the entire process, help you make the right decisions and ultimately ensure you

finish with that perfect solution to all your needs, in a package that you want to show off to everyone.

Moduline manager, David Gusmeroli said kitchen designers played an important role in creating desirable and functional kitchens.

"Kitchen designers can guide clients through such challenges as site difficulties, trade coordination, materials, finishes, hardware options, lighting options, while adhering to sound design principles and working to set budgets," he said.
